MA0320037_1

Which strategy can be used to find the value of 4×30 ?

- A** There are 4 groups of 3 tens, which means that there are 12 groups of 10.
- B** There are 4 groups of 30 tens, which means that there are 120 groups of 10.
- C** There are 4 groups of 30 hundreds, which means that there are 120 groups of 10.
- D** There are 4 groups of 300 hundreds, which means that there are 1200 groups of 10.

MA0321182_1

Tomas is using the fraction models shown to represent two different fractions.

Tomas will shade the same number of parts in each model. He says the fractions will be equivalent because the numerators will be the same. Which statement explains whether or not Tomas is correct?

- A** Tomas is incorrect, because eighths are less than fourths.
- B** Tomas is incorrect, because the denominators will be the same.
- C** Tomas is correct, because the fraction models are the same size.
- D** Tomas is correct, because the same number of parts will be shaded.
