7.	<p>5 Over bushes, under trees, between fence posts, <u>through the tangled hedge she swoops untouched.</u> <u>Bat is at home in the darkness as a fish is in the water.</u> She doesn't need to see—she can hear where she is going. Bat can see. But in the dark, good ears are more useful than eyes.</p> <p>6 <u>Bat shouts as she flies,</u> louder than a hammer blow, higher than a squeak. She beams her voice around her like a flashlight, and the echoes come singing back. They carry a sound picture of all her voice has touched. Listening hard, Bat can hear every detail, the smallest twigs, the shape of leaves. Gliding and fluttering back and forth, she shouts her torch of sound among the trees, listening for her supper.</p>	RI.3.2
