District Reminder: Kentucky Summative Assessment: Spring Testing

Here are a couple of reminders for preparing technology for the Kentucky Summative Assessment for the Spring of 2022.

1. All of your technology documentation for the Pearson TestNav application updates, device requirements, proctor caching and the download location for the TestNav applications can be found on the Pearson-Ky Portal, under the Technology Setup Tab: https://ky.mypearsonsupport.com/
2. The current supported Chrome OSes are versions 91 through 99. Version 99 (recently released) is <u>now</u> currently supported. Make sure to back-rev any devices that may have updated to 100 to the proper, supported versions of 91-99. Make sure that any devices that are below version 91 are updated to 91-99. Once your devices are running a supported OS, lock your device OS to the versions 91-99 (no higher than 99) or disable automatic updating of Chrome OS until you complete your testing window.
3. If you do have an issue during setup or during the test window, please call Pearson Support (**(888) 437-1430** Monday – Friday, 7:00 am - 8:30 pm ET) and initiate a support ticket. If your issue needs to be escalated, the existing ticket allows KDE and Pearson to leverage additional support tiers and assist in resolving any issues in an expedited fashion.
4. Also make sure the all of the destination URLs for Pearson TestNav are included in your permit lists and if using Lightspeed, to include them in your SSL Exclusions List.

TestNav Test Delivery URLs:Port

TestNav content is dynamically hosted in the cloud. No static IP addresses or ranges can be provided.

Your test delivery URL, for example:

- *.testnav.com:80
- *.testnav.com:443
- *.pearsontestcontent.com:80
- *.pearsontestcontent.com:443
- *.chime.aws
  - TCP:443
  - UDP:3478

Certificate Authority URLs

- *.thawte.com
- *.usertrust.com
- *.comodoca.com
- google-analytics.com (optional)

Tool/Assistive Technology URLs

Co:Writer

- *.cowriter.dev

- *.donjohnston.net

Speechstream

- *.speechstream.net
  - toolbar.speechstream.net
  - cache.speechstream.net
  - speech.speechstream.net

Prediction

- rwgoogle-webservices-7.texthelp.com

Microsoft Speech-to-Text

- testnav-cognitive-auth.dev.texthelp.com

Web Socket

- wss://eastus.stt.speech.microsoft.com/
